ASTEC

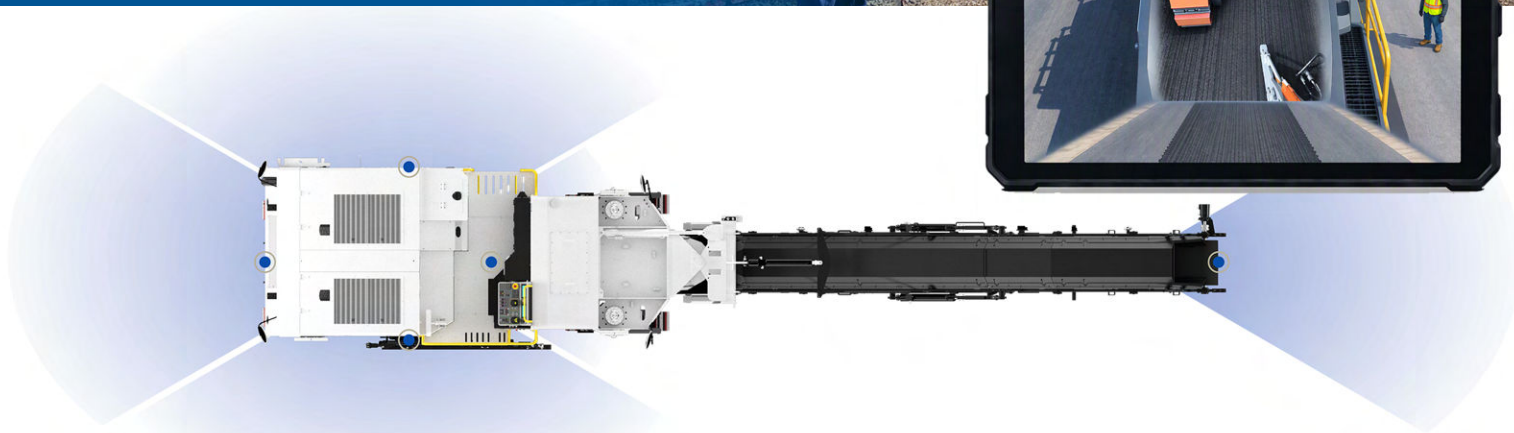

SITELINE®

SEE MORE. REACT FASTER. WORK WITH CONFIDENCE.

SiteLine® combines strategically positioned cameras, integrated wiring, advanced image processing, and an operator display to provide a custom panoramic view around select Astec | Roadtec cold planers.

The system brings critical working areas into one interface, helping operators monitor personnel, obstacles, truck positioning and the area around the machine.

THE SITELINE® OPERATOR ENVIRONMENTAL AWARENESS CAMERA SYSTEM

This revolutionary technology reflects Astec's commitment to enhancing job site safety and productivity. With seamless integration and cutting-edge features, SiteLine® is transforming the way road construction professionals work, protecting crews, and accelerating project timelines.

PANORAMIC VIEWS

Eliminates blind spots with a custom panoramic view around your equipment.

SEAMLESS IMAGE STICHING

Enjoy a natural, uninterrupted view with advanced processing that merges multiple camera feeds.

ZOOM-IN CAPABILITY

Easily tap to focus on specific areas for a detailed look, then return to the full view.

SAFETY AND EFFICIENCY

Identify hazards quickly to protect the entire crew, streamlining your project completion times.

VISIBILITY DESIGNED FOR MODERN OPERATIONS.

Available on select Astec Roadtec cold planers.
Contact your Astec representative for model and configuration compatibility.
